

INSTALLATION TRAINING

Installing & servicing (B)energy biogas systems

Have you always wanted to learn more about our technology and installation techniques? Are you ready to produce your own biogas or considering selling and installing biogas systems for a living? Perfect, this training is for you!

Who is this for?

Everybody who has taken (B)trained online or our new "understand biogas" training. In this course we teach you how to install your own biogas system or how to work as (B)energy installer.

What is it about?

The training content is broken down into five chapters:

- installation of a (B)energy biogas system (digester, backpack, and burner)
- user training – key of success
- maintenance & troubleshooting
- service tools for installers
- business model & marketing strategies

Why should you join?

As biogas user: save on installation cost, just install your own. And otherwise: the demand for skilled biogas systems installers is growing by the day. We work with distributors all over the world and are constantly looking to connect them with skilled installers. After this training you will be listed in our installer database and contacted as soon as business opportunities arise.

~~179€~~ | 17/03/22 | 09:00 - 17:00 | ONLINE

**FREE if you purchase a biogas system
